

CLARKE & SEVERN ELECTRONICS

NEW PRODUCT PRESS RELEASE DATE: August 2018

NEW PRODUCT: ARC Technologies Engineers Survival Kit

ARC Technologies have introduced their new “Engineer’s” Survival Kit.

This kit contains a variety of RF absorber materials in different thicknesses and form factors that address frequencies from 50MHz to 110GHz. It is available, at no cost, to Design Engineers to assist in finding solutions to the diverse range of EMI/RFI problems for today's military, aerospace and commercial electronics industry.

Standard or Custom solutions are available for near-field or far-field, narrowband or broadband applications.

For further details contact Clarke & Severn Electronics 02-94821944 or email sales@clarke.com.au or visit www.clarke.com.au/arc-technologies-inc.html
