

Press Release Beautiful with ODU

For the home massage device „wellbox“, which represents a technological revolution in the wellness market ODU, the connector specialist in Mühldorf, has developed a high-end customer-specific hybrid connector system.

The special development from ODU enables contacting of various massage attachments to the main device.

The massage heads work with two unique techniques, the “Motorized Roll-Smooth” for an in-depth sculpting action and the “Lift-Pulse” for an intensive skin firming action.

Based on long years of expertise, competence, and experience, ODU was able to achieve excellent results with special solutions custom-designed for the customer.
